NAME OF SCHEME	HDFC GOLD FUND (HGOF)		
Category of Scheme	Fund of Fund (Domestic)		
Type of Scheme	An Open-Ended Fund of Fund Scheme investing in HDFC Gold Exchange Traded Fund		
Investment Objective	To seek capital appreciation by investing in units of HDFC Gold Exchange Traded Fund. There is no assurance that the investment objective of the scheme will be realized.		
Asset Allocation Pattern of the Scheme	Type of Instruments	Normal Allocation (% of Total Assets)	Risk Profile
	Units of HDFC Gold Exchange Traded Fund	95-100	Medium to High
	Debt securities and money market instruments	0-5	Low to Medium
	The Scheme may invest in the schemes of Mutual Funds in accordance with the applicable extant SEBI (Mutual Funds) Regulations as amended from time to time. The Scheme may undertake (i) repo / reverse repo transactions in Corporate Debt Securities; (ii) Credit Default Swaps, (iii) Short Selling and such other transactions in accordance with guidelines issued by SEBI from time to time. Please refer to Scheme Information Document (SID) of the Scheme for complete details.		
Investment Strategy	The investment objective of the Scheme is to seek capital appreciation by investing in units of HDFC Gold Exchange Traded Fund (HGETF). To achieve the investment objective, the Scheme will predominantly invest in units of HGETF. The Scheme shall buy / sell HGETF units either directly with the Fund or through the secondary market on the Stock Exchange(s). Investment in Debt securities and money market instruments will be as per the limits in the asset allocation table of the Scheme, subject to permissible limits laid under SEBI (MF) Regulations. Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook. The Scheme may also invest in the schemes of Mutual Funds. Though every endeavor will be made to achieve the objective of the Scheme, the AMC/Sponsors/Trustees do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.		
Comparison of Existing Schemes & Risk Mitigation Strategy	HGOF is the only scheme launched by the Mutual Fund under the open ended Fund of Funds Scheme category which predominantly invests in HGETF. Hence, this Scheme cannot be compared with any of the existing schemes of HDFC Mutual Fund.		
Risk Mitigation Strategy	The key risks associated with investments in the following assets of HGOF are given below including the manner in which the AMC would endeavor to address them-		
	Type of Risks	Risk Mitigation Strategy	
	Operational Risk- Ability of the Fund to process the purchase/ redemption requests within the stipulated time period under the Scheme.	The underlying scheme primarily invests in physical gold which satisfy the norms of 'Good Delivery' as defined by London Bullion Markets association. Liquidity issues are not envisaged as gold is a globally traded commodity and thereby very liquid. The processing of purchase / redemption requests received by the Scheme will depend on the ability to buy/ sell units of the Underlying Scheme in creation unit size. Consequently, the underlying scheme shall buy/sell physical gold in creation unit size only. Further, the Scheme shall also endeavor to process the purchase/ redemption requests by buying/selling the units of the underlying scheme on the stock exchange(s) in the secondary market.	
	Tracking error- Tracking error means the variance between daily returns of the underlying benchmark (gold in this case) and the NAV of the Scheme for any given period.	Tracking error due to movement in prices of physical gold will impact the performance of the Scheme. However, the Scheme will endeavor to keep tracking error as low as possible by: <ul style="list-style-type: none"> Appointing leaders in bullion business as Authorized participants/ Market Makers under HGETF to enhance liquidity on the stock exchange and reduce the impact cost and that will help the Fund to minimize tracking error. Appointing leading bullion banks to make gold bars available for creation of units under HGETF. Estimate the inputs regarding cash flows by various modes of acceptance on a daily basis. The subscription/ redemption request will also be reported and used as a basis for planning investments in HGETF. The deployment will be carefully planned on the basis of the mode of acceptance of instrument to moderate tracking error. For small amounts of inflows/outflows which are less than the creation size of HGETF, the Scheme will buy/sell HGETF units directly on the stock exchange without waiting for additional subscription redemption to minimize tracking error. Offsetting the expenses/interest against the net inflows/outflows and investing/ redeeming the balance amount from HGETF to minimize the tracking error in best interest of investors. 	
	Government Securities, Money Market Instruments and Liquid Schemes		
	Type of Risks	Risk Mitigation Strategy	
	Credit Risk	A detailed credit evaluation of each investment opportunity will be undertaken. Investments will usually be in instruments that have been assigned high investment grade ratings by a recognised rating agency. Unrated investments, if any, would require specific approval from a committee constituted for the purpose.	
	Interest Rate Risk	An interest rate scenario analysis would be performed on an on-going basis, considering the impact of the developments on the macro-economic front and the demand and supply of funds. Based on the above analysis, the AMC would manage the duration of the debt investments of the Scheme on a dynamic basis to exploit emerging opportunities in the investment universe and manage risks at all points in time.	
	Liquidity Risk	The AMC will attempt to reduce liquidity risk by investing in securities that would result in a staggered maturity profile of the portfolio, investment in securities that provide relatively easy liquidity and securities that have reasonable secondary market activity. Exposure to debt securities, other than Sovereign exposures, would be diversified, comprising a number of issuers across the financial and manufacturing/ services sectors. This shall aid in managing concentration risk and sector-specific risks. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The fund will comply with all applicable exposure limits and take actions. Effective and continuous monitoring of the Scheme shall be ensured and necessary actions, if any shall be taken, if required.

Risk Mitigation Strategy	<ul style="list-style-type: none"> • The Scheme's portfolio comprises a judicious mix of equity and debt investments. The Scheme has the flexibility to vary the debt component from 75% to 90% and equity component from 10% to 25%. • The Scheme seeks to manage the duration of debt assets on a proactive basis to manage interest rate risks and to optimise returns. • A credit evaluation of each debt exposure would be undertaken. This would also consider the credit ratings given to the instrument by recognised rating agencies. Investments in debt / money market securities would normally be undertaken in instruments that have been assigned high investment grade ratings by any of the recognised rating agencies. Unrated investments, if any, would require specific approval from a committee constituted for the purpose. • The Scheme aims to maintain a well-diversified equity portfolio comprising stocks across various sectors of the economy. This shall aid in managing concentration risk and sector specific risks. • The Scheme targets to maintain exposure across different market cap segments - i.e. large, mid-cap and small cap. This shall aid in managing volatility and also improve liquidity. The debt and money market investments of the scheme also help in maintaining the necessary portfolio liquidity. <p>Investments in debt securities would be undertaken after assessing the associated credit risk, interest rate risk and liquidity risk.</p>

Information common to Schemes (as applicable) (Contd.)

2) Risk Profile of the Schemes

Scheme Specific Risk Factors

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Document of the respective Scheme carefully for details on risk factors before investment. Scheme specific Risk Factors include but are not limited to the following:

Risk Factors specific to HDFC Growth Opportunities Fund

The Scheme's portfolio shall comprise equity holdings of large cap (minimum 35% and maximum 65% of the portfolio) and mid cap stocks (minimum 35% and maximum 65% of the portfolio). The Scheme may also invest upto 30% in small cap stocks. While Small & Mid-cap stocks gives one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that Small & Midcap stocks can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in small & mid cap stocks are more than investing in stocks of large well established companies. It should be noted that over a period of time, small-cap, mid-cap and large-cap stocks have demonstrated different levels of volatility and investment returns. And it is important to note that generally, no one class consistently outperforms the others.

Risk Factors specific to HDFC Mid-Cap Opportunities Fund and HDFC Small Cap Fund

While Small & Mid-cap stocks gives one an opportunity to go beyond the usual large blue chip stocks and present possible higher capital appreciation, it is important to note that Small & Mid-cap stocks can be riskier and more volatile on a relative basis. Therefore, the risk levels of investing in Small & Mid-cap stocks are more than investing in stocks of large well-established companies. It should be noted that over a period of time, Small, Mid and Large cap stocks have demonstrated different levels of volatility and investment returns. And it is important to note that generally, no one class consistently outperforms the others.

Risk Factors specific to HDFC Capital Builder Value Fund

The Scheme invests at least 50% of equity portfolio in stocks whose trailing Price to Earnings ratio (P/E) and/or trailing Price to Book ratio (P/B) is lower than the corresponding median of the benchmark. It is important to note that such an approach is not proven to outperform the benchmark.

Risk Factors specific to HDFC Focused 30 Fund

The Scheme seeks to generate long term capital appreciation/income by investing in equity & equity related instruments of up to 30 companies. This concentrated nature of the portfolio may result in higher levels of volatility vis-à-vis other diversified equity oriented schemes. Since the scheme will invest in not more than 30 stocks, it is also expected to have higher market liquidity risk compared to a regular diversified equity scheme.

Risk Factors specific to HDFC Infrastructure Fund

- The investments under the Scheme are predominantly oriented towards equity/ equity related instruments of Companies engaged in the area of growth and development of infrastructure and hence will be affected by risks associated with such companies.
- Given that the Scheme seeks to invest in equity/ equity related instruments of the Companies belonging to the infrastructure sector and that the investment concentration may be high in certain companies belonging to the said sector, the volatility and/or performance of the said sector and/or of the scrips belonging to this sector can have a material adverse bearing on the performance of the Scheme.
- Although the Scheme seeks to make investments in equity and equity related instruments of the Infrastructure sector, this scheme will not be a sector specific scheme for the purpose of monitoring the investment restrictions applicable to the Scheme and hence investments per issuer under the Scheme will not exceed 10% (at the time of investment) of the net assets of the Scheme.
- As the Scheme may hold securities that are not in the NIFTY 500 Index and may invest in limited number of sectors with higher concentration to certain sectors and industries, it may perform differently from the NIFTY 500 Index. Further Scheme's performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.

Risk Factors specific to HDFC TaxSaver

Units of HDFC TaxSaver cannot be assigned/ transferred/ pledged/ redeemed/ switched out until completion of three years from the date of allotment of the respective Units.

Risk Factors specific to HDFC Arbitrage Fund

The primary objective of the Fund Manager is to identify investment opportunities and to exploit price discrepancies in various markets. Identification and exploitation of the strategies to be pursued by the Fund Manager involve uncertainty. No assurance can be given that Fund Manager will be able to locate investment opportunities or to correctly exploit price discrepancies in the capital markets. Reduction in mis-pricing opportunities between the cash market and Future and Options market may lead to lower level of activity affecting the returns. As the Scheme proposes to execute arbitrage transactions in various markets simultaneously, this may result in high portfolio turnover and, consequently, high transaction cost.

There may be instances, where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the fund manager due to lack of opportunities in the derivative market may not be able to outperform liquid / money market funds.

Though the constituent stocks of most indices are typically liquid, liquidity differs across stock. Due to heterogeneity in liquidity in the capital market segment, trades on this segment do not get implemented instantly. This often makes arbitrage expensive, risky and difficult to implement.

Risk Factors specific to HDFC Arbitrage Fund, HDFC Balanced Advantage Fund, HDFC Equity Savings Fund and HDFC Multi-Asset Fund

Risk factors associated with potential change in tax structure:

As per the asset allocation table, the Scheme has the flexibility to invest its total assets in either debt securities or equity and equity related instruments upto the limits specified therein.

For qualifying as an equity oriented fund, under the Income Tax Act, the investible funds of the Scheme are required to be invested in equity shares of domestic companies to the extent of more than 65 per cent of the total assets of such scheme. The percentage of equity shareholding of the scheme shall be

computed with reference to the annual average of the monthly averages of the opening and closing figures.

As per the current Income Tax laws, the tax provisions for equity oriented funds are more favourable as compared to other than equity oriented funds i.e. debt funds. Given the flexibility the scheme has in allocating the investible funds, the equity allocation may fall below this threshold and it is possible that the equity allocation remains below 65% over a prolonged period, consequently the Scheme shall not be treated as an equity oriented fund in that particular financial year. In such situation, a Unitholder who has redeemed the units during the respective financial year may end up paying capital gain tax as applicable to a debt fund and consequently would also not be able to derive any benefit of STT paid at the time of redemption.

Investors are requested to refer to the section "Taxation" in SID. In view of the foregoing and individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.

Risk Factors specific to HDFC Multi-Asset Fund (Related to Gold Investments)

Risk factors associated with investment in gold and gold related instruments

- The Scheme shall invest in Gold, Gold Exchange Traded Funds (Gold ETFs) and Gold related instruments (including derivatives, Sovereign Gold Bonds etc as and when SEBI/RBI permits). Investments by the Scheme are subject to availability of Gold. If favorable investment opportunities do not exist or opportunities have notably diminished, the Scheme may invest in other permitted asset classes. The changes in asset allocation may result in higher transaction costs. There is no assurance that gold will maintain its long-term value in terms of purchasing power. In the event of price of gold declining, the value of investment in Units of the Scheme is expected to decline proportionately.
- The value (price) of gold may fluctuate for several reasons and all such fluctuations will impact the NAV of Units under the Scheme. The factors that may effect the price of gold, among other things, include demand and supply for gold in India and in the global market, Indian and Foreign exchange rates, Interest rates, Inflation trends, market risks including trading risks in gold as commodity, legal restrictions on the movement/trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to / from India, trends and restrictions on import / export of gold in and out of India, etc.
- Governments, central banks and related institutions world wide, own a significant portion of the aggregate world gold holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price / value of units of the Scheme, to the extent invested in gold, will be adversely affected.

Risks associated with investments in physical Gold

- **Counter party Risk:** There is no Exchange for physical gold in India. The Scheme may have to buy or sell gold from the open market, which may lead to counter party risks for the Scheme for trading and settlement.
- **Physical gold:** There is a risk that part or all of Scheme's gold could be lost, damaged or stolen. Access to gold held by the Scheme /underlying Gold ETFs could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the Scheme and consequently on investment / redemption in Units of the Scheme.
- **Liquidity Risk:** The Scheme has to sell gold to bullion bankers / traders who are authorized to buy gold. Though, there are adequate numbers of players (commercial or bullion bankers) to whom the Scheme can sell gold, the Scheme may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses.
- **Indirect taxation:** For valuation of gold, indirect taxes like customs duty, VAT, etc. would also be considered. Hence, any change in the rates of indirect taxation / applicable rates would affect the valuation of gold and consequently of the Scheme, to the extent it is invested in gold.
- **Risk associated with Lending of physical Gold**

The physical gold lending activity by the Scheme will have the inherent probability of collateral value drastically falling in time of strong downward market trends resulting in inadequate value of collateral. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme.

Also the risk could be in the form of non-availability of ready physical gold for sale, during the period physical gold is lent. Physical Gold would be lent if permitted by the concerned regulatory authorities in India.

Risks associated with investments in Gold ETFs

To the extent the Scheme's assets are invested in Gold ETFs, the risks associated with the underlying Gold ETFs, will also be applicable. Some of them are explained below:

- **Currency Risk:** The formula for determining NAV of the Units of Gold ETFs is based on the imported (landed) value of gold. Landed value of gold held by Gold ETFs is computed by multiplying international market price by US dollar value. The value of gold or NAV, therefore will depend upon the conversion value of US dollar into Indian rupee and attracts all the risks attached to such conversion.
- **Regulatory Risk:** Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Authorised Participant of Gold ETFs to arbitrage resulting into wider premium/ discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the underlying Gold ETFs to buy / sell gold against the purchase and redemption requests received.
- Units of Gold ETFs may be acquired from the stock exchanges where the price quoted may be at variance with the underlying NAV, resulting in higher acquisition costs.
- **Taxation:** Conversion of underlying physical gold into units of Gold ETFs may attract capital gain tax depending on acquisition cost and holding period. Moreover, converting units of the underlying scheme to Gold may also attract Wealth tax. Furthermore, Gold is subject to indirect tax not restricted to the following: Sales Tax, Octroi, VAT, Stamp Duty, and Custom Duty. Hence,

Information common to Schemes (as applicable) (Contd.)

any change in the rates of taxation/applicable taxes would affect the valuation of the Scheme.

• Redemption Risk

- The units issued under the Scheme, when predominantly invested in Gold ETFs, will derive liquidity from the underlying Gold ETF having creation / redemption process in creation unit size of predefined quantity of physical gold (e.g. 1 kg). At times prevailing market conditions may affect the ability of the underlying Gold ETFs to sell gold against the redemption request received.
- Furthermore, the endeavor would always be to get cash on redemptions from the underlying Gold ETFs. However, in case the underlying Gold ETF is unable to sell for any reason, and delivers physical gold, there could be delay in payment of redemption proceeds pending such realization.
- Additionally, the Scheme will derive liquidity from trading units of underlying Gold ETFs on the exchange(s) in the secondary market which may be inherently restricted by trading volumes, settlement periods and transfer procedures. As there is no active secondary market for Gold ETFs, the processing of redemption requests at times may be delayed. In the event of an inordinately large number of redemption requests, or re-structuring of the Scheme's investment portfolio, the processing of redemption requests may be delayed.
- Gold ETFs would ordinarily repurchase Units in Creation Unit Size. Thus Unit holding less than Creation Unit Size can only be sold through the secondary market on the Exchange.

Further, the price received upon the redemption of Units of Gold ETFs may be less than the value of the gold represented by them.

• Market Trading Risks

- Although units of Gold ETFs are listed on recognised stock exchange(s), there can be no assurance that an active secondary market will be developed or be maintained.
- Trading in units of Gold ETFs on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI, trading in units of Gold ETFs is not advisable. In addition, trading in units of Gold ETFs is subject to trading halts caused by extraordinary market volatility and pursuant to the Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of units of Gold ETFs will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV.
- The units of Gold ETFs may trade above or below their NAV. The NAV of Gold ETFs will fluctuate with changes in the market value of that scheme's holdings. The trading prices of units of Gold ETFs will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units of Gold ETF.
- Gold ETFs may provide for the creation and redemption of units in Creation Unit Size directly with the concerned Mutual Fund and therefore, it is expected that large discounts or premiums to the NAV of the units of Gold ETFs will not sustain due to arbitrage opportunity available.

Risk Factors specific to HDFC Index Fund-NIFTY 50 Plan and HDFC Index Fund – SENSEX Plan

Performance of the S&P BSE SENSEX / NIFTY 50 Index ("the Underlying Index") will have a direct bearing on the performance of the Plans. In the event the Underlying Index is dissolved or is withdrawn or is not published due to any reason whatsoever, the Trustee reserves the right to modify the Plans so as to track a different and suitable index or to suspend tracking the Underlying Index till such time it remains dissolved / withdrawn or not published and appropriate intimation will be sent to the Unit holders of the Plans. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the Plans will be subject to tracking errors during the intervening period.

Tracking errors are inherent in any index fund and such errors may cause the Plans to generate returns which are not in line with the performance of the Underlying Index or one or more securities covered by / included in the Underlying Index and may arise from a variety of factors including but not limited to:

- Any delay in the purchase or sale of shares due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of dividends, etc.
- The Indices reflect the prices of securities at a point in time, which is the price at close of business day on BSE / National Stock Exchange of India Limited (NSE). The Plans, however, may trade these securities at different points in time during the trading session and therefore the prices at which the Plan trades may not be identical to the closing price of each scrip on that day on the BSE / NSE. In addition, the Plans may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from BSE / NSE closing prices.
- The Underlying Index from time to time may exclude existing securities or include new ones. In such an event, the Plans will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Underlying Index during this period.
- The potential of trades to fail may result in the Plans not having acquired the security at the price necessary to mirror the Underlying Index.
- Transaction and other expenses, such as but not limited to brokerage, custody, trustee and investment management fees.
- Being an open-ended scheme, the Plans may hold appropriate levels of cash or cash equivalents to meet ongoing redemptions.
- The Plans may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices.

Due to the reasons mentioned above and other reasons that may arise, it is expected that the Plans may have a tracking error in the range of 2-3% per annum from its Benchmark. However, it

needs to be clearly understood that the actual tracking error can be higher or lower than the range given.

In case of investments in derivatives like index futures, the risk reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market.

Risk Factors specific to HDFC Gold Fund

- The Scheme shall invest predominantly in HDFC Gold Exchange Traded Fund (HGETF - the underlying scheme). Hence the Scheme's performance shall primarily depend upon the performance of HGETF. Any change in the investment policies or the fundamental attributes of the underlying scheme could affect the performance of the Scheme.
- All risks associated with the underlying scheme, including performance of underlying physical gold, asset class risk, passive investment risk, indirect taxation risk, etc., will therefore be applicable to this Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying scheme.
- The Portfolio disclosure of the Scheme will be limited to providing the particulars of the underlying scheme where the Scheme has invested and will not include the investments made by the underlying scheme.
- The value (price) of gold may fluctuate for several reasons and all such fluctuations will result in changes in the NAV of Units under the Scheme. The factors that may effect the price of gold, among other things, include demand and supply for gold in India and in the global market, Indian and Foreign exchange rates, Interest rates, Inflation trends, market risks including trading risks in gold as commodity, legal restrictions on the movement/trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to/from India, trends and restrictions on import/export of gold in and out of India, etc.
- The Scheme assets are predominantly invested in HGETF and valued at the market price of the said units on the principal exchange. The same may be at a variance to the NAV of the underlying scheme, due to market expectations, demand / supply of the HGETF units, prevailing market conditions, etc. To that extent the performance of Scheme shall be at variance with that of the underlying scheme.
- The changes in asset allocation may result in higher transaction costs.
- The Scheme will subscribe according to the value equivalent to unit creation size as applicable for the underlying scheme. When subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed in Debt, Government Securities and Money market instruments which will have a different return profile compared to gold returns profile.

Alternatively the units of the underlying scheme may be acquired from the stock exchanges where the price quoted may be at variance with the underlying NAV, resulting in a higher acquisition costs.

- **Taxation:** Repurchase of units of the underlying scheme or sale of units of the underlying scheme on the Stock Exchange may attract short or long term capital gain tax depending upon the acquisition cost and holding period of the Units. Moreover, converting units of the underlying scheme to Gold may also attract Wealth tax. Furthermore, Gold is subject to indirect tax not restricted to Sales Tax, Octroi, VAT, Stamp Duty, and Custom Duty. Hence, any change in the rates of taxation / applicable taxes would affect the valuation of the Scheme.
- **Redemption Risk:** The units issued under the Scheme will derive liquidity primarily from the underlying scheme having creation / redemption process in creation unit size of predefined quantity of physical gold (currently 1 kg). At times prevailing market conditions may affect the ability of the underlying scheme to sell gold against the redemption request received.

Furthermore, the endeavor would always be to get cash on redemptions from the underlying scheme. However, in case the underlying scheme is unable to sell for any reason, and delivers physical gold, there could be delay in payment of redemption proceeds pending such realization.

Additionally, the Scheme will derive liquidity from trading units of underlying scheme on the exchange(s) in the secondary market which may be inherently restricted by trading volumes, settlement periods and transfer procedures. As there is no active secondary market developed or maintained by the underlying scheme, the processing of redemption requests at times may be delayed.

In the event of an inordinately large number of redemption requests, or re-structuring of the Scheme's investment portfolio, the processing of redemption requests may be delayed.

Risk factors associated with HGETF

- **Market Risk:** The value of the Units of HGETF relates directly to the value of the gold held by HGETF and fluctuations in the price of gold could adversely affect investment value of the Units of HGETF. The factors that may effect the price of gold, inter alia, include economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, etc.
- **Currency Risk:** The formula for determining NAV of the Units of HGETF is based on the imported (landed) value of gold. HGETF landed value of gold is computed by multiplying international market price by US dollar value. The value of gold or NAV, therefore will depend upon the conversion value of US dollar into Indian rupee and attracts all the risks attached to such conversion.
- **Counter party Risk:** There is no Exchange for physical gold in India. HGETF may have to buy or sell gold from the open market, which may lead to counter party risks for the scheme for trading and settlement.
- **Asset Class Risk:** The returns from physical Gold in which HGETF invests may underperform returns from the securities or other asset classes.
- **Physical gold:** There is a risk that part or all of HGETF's gold could be lost, damaged or stolen. Access to HGETF's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of HGETF and consequently on investment /

Information common to Schemes (as applicable) (Contd.)

redemption in Units of HGETF.

- **Liquidity Risk:** HGETF has to sell gold only to bullion bankers/traders who are authorized to buy gold. Though, there are adequate numbers of players (commercial or bullion bankers) to whom HGETF can sell gold, HGETF may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses.
 - **Regulatory Risk:** Any changes in trading regulations by the stock exchange(s) or SEBI may affect the ability of Authorised Participant of HGETF to arbitrage resulting into wider premium/ discount to NAV. Any changes in the regulations relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of HGETF to buy/ sell gold against the purchase and redemption requests received.
 - **Passive Investments:** HGETF is not actively managed. The performance of HGETF may be affected by a general price decline in the Gold prices. HGETF invests in the physical Gold regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets.
 - **Indirect taxation:** For the valuation of gold by HGETF, indirect taxes like customs duty, VAT, etc. would also be considered. Hence, any change in the rates of indirect taxation would affect the valuation of HGETF.
 - **Operational Risks:** Gold Exchange Traded Funds (GETFs) are relatively new products and their value could decrease if unanticipated operational or trading problems arise. HDFC Gold Exchange Traded Fund, an open ended Exchange Traded Fund, is therefore subject to operational risks.
- In addition, investors should be aware that there is no assurance that gold will maintain its long-term value in terms of purchasing power. In the event that the price of gold declines, the value of investment in Units of HGETF is expected to decline proportionately.
- **Redemption Risk:** Though this is an open-ended scheme, HGETF would ordinarily repurchase Units in Creation Unit Size. Thus Unit holding less than Creation Unit Size can only be sold through the secondary market on the Exchange. Further, the price received upon the redemption of Units of HGETF may be less than the value of the gold represented by them. A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors.

Risk associated with Lending of physical Gold

- The physical gold lending activity by HGETF will have the inherent probability of collateral value drastically falling in time of strong downward market trends resulting in inadequate value of collateral. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This along with a simultaneous fall in value of collateral would render potential loss to HGETF. Also the risk could be in the form of non-availability of ready physical gold for sale, during the period physical gold is lent. Physical Gold would be lent if permitted by the concerned regulatory authorities in India.

Market Trading Risks

- Although units of HGETF are listed on the Exchange, there can be no assurance that an active secondary market will be developed or be maintained.
- Trading in units of HGETF on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange Authorities or SEBI, trading in units of HGETF is not advisable. In addition, trading in units of HGETF is subject to trading halts caused by extraordinary market volatility and pursuant to the Exchange and SEBI 'circuit filter rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of units of HGETF will continue to be met or will remain unchanged.
- Any changes in trading regulations by the Stock Exchange(s) or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV.
- The units of HGETF may trade above or below their NAV. The NAV of HGETF will fluctuate with changes in the market value of scheme's holdings. The trading prices of units of HGETF will fluctuate in accordance with changes in their NAV as well as market supply and demand for the units of HGETF.
- The Trustee, in general interest of the Unit holders of HGETF and keeping in view of the unforeseen circumstances/ unusual market conditions, may limit the total number of units, which can be redeemed on any Business Day.
- Governments, central banks and related institutions worldwide, own a significant portion of the aggregate world gold holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price of units of HGETF will be adversely affected.
- HGETF may provide for the creation and redemption of units in Creation Unit Size directly with the Fund and therefore, it is expected that large discounts or premiums to the NAV of the units of HGETF will not sustain due to arbitrage opportunity available.
- Conversion of underlying physical gold into the units of HGETF may attract capital gain tax depending on acquisition cost and holding period.

Risk factors related to HDFC Dynamic PE Ratio Fund of Funds (HDPEFOF)

Risk Factors related to Underlying Schemes

- a) HDPEFOF will invest primarily in a combination of the specified equity and debt schemes of HDFC Mutual Fund. Hence, scheme specific risk factors of the Underlying Schemes will be applicable. All risks associated with Underlying Schemes, including performance of their underlying stocks, derivative instruments, stock-lending, investments in foreign securities etc., will therefore be applicable in the case of HDPEFOF. The investors should refer to the Scheme Information Documents and the related addenda for the scheme specific risk factors of the respective Underlying Schemes. Investors who intend to invest in HDPEFOF are required to and deemed to have understood the risk factors of the Underlying Schemes.
- b) Movements in the Net Asset Value (NAV) of the Underlying Schemes may impact the performance of HDPEFOF. Any change in the investment policies or fundamental attributes of the

Underlying Schemes will affect the performance of HDPEFOF.

- c) In a rising market, where PE ratio rises and stays above historical averages, a portfolio constructed based on PE ratios may not outperform a fully invested equity portfolio.
- d) The investors of HDPEFOF shall bear the recurring expenses of HDPEFOF in addition to the expenses of the Underlying Schemes (subject to regulatory limits). Hence the investor under HDPEFOF may receive lower pre-tax returns than what they may receive if they had invested directly in the Underlying Schemes in the same proportions.
- e) The Portfolio disclosure of HDPEFOF will be limited to providing the particulars of the allocation to the Underlying Schemes where HDPEFOF has invested and will not include the investments made by the Underlying Schemes.
- f) HDPEFOF's investment in any Underlying Scheme shall not exceed 20% of the net assets of that Underlying Scheme.
- g) Redemptions by HDPEFOF shall not exceed 5% of the net assets of an Underlying Scheme on a Business Day. The redemptions will be staggered to comply with this limit even in case portfolio rebalancing is triggered due to change in PE Ratios.
- h) Redemptions by HDPEFOF from the Underlying Schemes would be subject to applicable exit loads, which may impact performance of the Scheme.
- i) The processing of redemption requests within 10 Business Days of the Redemption date will be subject to the ability of the Scheme to liquidate units of the underlying scheme(s) the payment of redemption proceeds under the Scheme will be subject to receipt of redemption proceeds from the underlying scheme(s).
- j) Switch-out from an Underlying Scheme and Switch-in to another Underlying Scheme will be subject to the provisions of applicability of NAV as also the pay-out and pay-in cycles applicable to redemption / purchase under the relevant schemes. In times of extreme volatility, this may have some impact on the NAV of HDPEFOF, particularly at the time of portfolio rebalancing.

Risk factors associated with investing in equities and equity related instruments (For all Schemes)

- Equity shares and equity related instruments are volatile and prone to price fluctuations on a daily basis. Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme(s) unless they can afford to take the risks.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges. Investment in such securities may lead to increase in the scheme portfolio risk.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme(s) incurring losses till the security is finally sold.

Risk factors associated with investing in Fixed Income Securities (For all schemes)

- The Net Asset Value (NAV) of the Scheme(s), to the extent invested in Debt and Money Market instruments, will be affected by changes in the general level of interest rates. The NAV of the Scheme(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme(s) and may lead to the Scheme(s) incurring losses till the security is finally sold.
- Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- Investment in Debt instruments are subject to varying degree of credit risk or default risk (i.e. the risk of an issuer's inability to meet interest and principal payments on its obligations) or any other issues, which may have their credit ratings downgraded. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic and/ or political conditions specific to an issuer, all of which are factors that may have an adverse impact on an issuer's credit quality and security values. This may increase the risk of the portfolio. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.
- Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. The price-risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.
- The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.
- As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates and are subject to issuer default risk. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.

Information common to Schemes (as applicable) (Contd.)

- **Prepayment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the Scheme to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Settlement Risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances.
Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.
- The Scheme(s) at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.

General Risk factors (For all schemes)

- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme(s). Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme(s) can go up or down because of various factors that affect the capital markets in general.
- As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme(s). In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described under 'Right to Restrict Redemption and / or Suspend Redemption of the units' mentioned in SID.
- At times, due to the forces and factors affecting the capital market, the Scheme(s) may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme(s). The Scheme(s) may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in unlisted securities that offer attractive returns. This may increase the risk of the portfolio.
- Investment strategy to be adopted by the Scheme(s) may carry the risk of significant variance between the portfolio allocation of the Scheme(s) and the Benchmark particularly over a short to medium term period.
- Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.

Risk factors associated with investing in Foreign Securities (For schemes other than HDFC Dynamic PE Ratio Fund of Funds, HDFC Index Fund – SENSEX Plan, HDFC Index Fund- NIFTY Plan, HDFC Gold Fund)

- **Currency Risk:**
Moving from Indian Rupee (INR) to any other currency entails currency risk. To the extent that the assets of the Scheme(s) will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee.
- **Interest Rate Risk:**
The pace and movement of interest rate cycles of various countries, though loosely co-related, can differ significantly. Hence by investing in securities of countries other than India, the Scheme(s) stand exposed to their interest rate cycles.
- **Credit Risk:**
Investment in Foreign Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. This is substantially reduced since the SEBI (MF) Regulations stipulate investments only in debt instruments with rating not below investment grade by accredited/registered credit rating agency.
- **Taxation Risk:**
In addition to the disclosure related to taxation mentioned under section "Special Consideration" in the SID, Investment in Foreign Securities poses additional challenges based on the tax laws of each respective country or jurisdiction. The scheme may be subject to a higher level of taxes than originally anticipated and or dual taxation.
The Scheme may be subject to withholding or other taxes on income and/or gains arising from its investment portfolio. Further, such investments are exposed to risks associated with the changing / evolving tax / regulatory regimes of all the countries where the Scheme invests. All these may entail a higher outgo to the Scheme by way of taxes, transaction costs, fees etc. thus adversely impacting its NAV; resulting in lower returns to an Investor.

- **Legal and Regulatory Risk:**
Legal and regulatory changes could occur during the term of the Scheme which may adversely affect it. If any of the laws and regulations currently in effect should change or any new laws or regulations should be enacted, the legal requirements to which the Scheme and the investors may be subject could differ materially from current requirements and may materially and adversely affect the Scheme and the investors. Legislation/ Regulatory guidelines could also be imposed retrospectively.
- **Country Risk:**
The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.
- To manage risks associated with foreign currency and interest rate exposure, the Mutual Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI/ RBI from time to time.

Risk factors associated with investing in Derivatives (For schemes other than HDFC Dynamic PE Ratio Fund of Funds and HDFC Gold Fund)

- The AMC, on behalf of the Scheme(s) may use various derivative products, from time to time, in an attempt to protect the value of the portfolio and enhance Unit holders' interest. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.
- **Credit Risk:** The credit risk in derivative transaction is the risk that the counter party will default on its obligations and is generally low, as there is no exchange of principal amounts in a derivative transaction.
- **Illiquidity risk:** This is the risk that a derivative cannot be sold or purchased quickly enough at a fair price, due to lack of liquidity in the market
- **Additional Risk viz. Basis Risk associated with imperfect hedging using IRF:** The imperfect correlation between the prices of securities in the portfolio and the IRF contract used to hedge part of the portfolio leads to basis risk. Thus, the loss on the portfolio may not exactly match the gain from the hedge position entered using the IRF.

Risk Factors associated with REITs and InvITs (For HDFC Arbitrage Fund, HDFC Hybrid Equity Fund, HDFC Focused 30 Fund, HDFC Equity Savings Fund, HDFC Balanced Advantage Fund, HDFC Growth Opportunities Fund, HDFC Multi-Asset Fund, HDFC Top 100 Fund, HDFC Capital Builder Value Fund, HDFC Equity Fund, HDFC Infrastructure Fund, HDFC Mid Cap Opportunities Fund, HDFC Small Cap Fund)

- **Price Risk:**
Securities / Instruments of REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. The extent of fall or rise in the prices is a fluctuation in general market conditions, factors and forces affecting capital market, Real Estate and Infrastructure sectors, level of interest rates, trading volumes, settlement periods and transfer procedures.
- **Interest Rate Risk:**
Securities / Instruments of REITs and InvITs run interest rate risk. Generally, when interest rates rise, prices of units fall and when interest rates drop, such prices increase.
- **Credit Risk:**
Credit risk means that the issuer of a REIT / InvIT security / instrument may default on interest payment or even on paying back the principal amount on maturity. Securities / Instruments of REITs and InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Liquidity Risk:**
This refers to the ease with which securities / instruments of REITs / InvITs can be sold. There is no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the units could be infrequent. The subsequent valuation of illiquid units may reflect a discount from the market price of comparable securities / instruments for which a liquid market exists. As these products are new to the market they are likely to be exposed to liquidity risk.
- **Reinvestment Risk:**
Investments in securities / instruments of REITs and InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Legal and Regulatory Risk:**
The regulatory framework governing investments in securities / instruments of REITs and InvITs comprises a relatively new set of regulations and is therefore untested, interpretation and enforcement by regulators and courts involves uncertainties. Presently, it is difficult to forecast as to how any new laws, regulations or standards or future amendments will affect the issuers of

Information common to Schemes (as applicable) (Contd.)

REITs / InvITs and the sector as a whole. Furthermore, no assurance can be given that the regulatory system will not change in a way that will impair the ability of the Issuers to comply with the regulations, conduct the business, compete effectively or make distributions.

Risk factors associated with investing in Securitised Debt (For all schemes)

The Risks involved in Securitised Papers described below are the principal ones and does not represent that the statement of risks set out hereunder is exhaustive.

• Limited Liquidity & Price Risk

There is no assurance that a deep secondary market will develop for the Certificates. This could limit the ability of the investor to resell them.

• Limited Recourse, Delinquency and Credit Risk

The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the Issuer or the Seller or the originator, or the parent or any affiliate of the Seller, Issuer and Originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the Credit Enhancement and thereby the Investor Payouts to the Certificate Holders may get affected if the amount available in the Credit Enhancement facility is not enough to cover the shortfall. On persistent default of an Obligor to repay his obligation, the Servicer may repossess and sell the Asset. However many factors may affect, delay or prevent the repossession of such Asset or the length of time required to realise the sale proceeds on such sales. In addition, the price at which such Asset may be sold may be lower than the amount due from that Obligor.

• Risks due to possible prepayments and Charge Offs

In the event of prepayments, investors may be exposed to changes in tenor and yield. Also, any Charge Offs would result in the reduction in the tenor of the Pass Through Certificates (PTCs).

• Bankruptcy of the Swap Bank

If the Swap Bank, becomes subject to bankruptcy proceedings then an Investor could experience losses or delays in the payments due under the Interest Rate Swap Agreement.

• Risk of Co-mingling

With respect to the Certificates, the Servicer will deposit all payments received from the Obligors into the Collection Account. However, there could be a time gap between collection by a Servicer and depositing the same into the Collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the Loan Agreements may not be segregated from other funds of originator. If originator in its capacity as Servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss.

Risk factors associated with Securities Lending (For schemes other than HDFC Dynamic PE Ratio Fund of Funds and HDFC Gold Fund)

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Risks associated with processing of transactions through Stock Exchange Mechanism (For all schemes)

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

- In respect of valid applications received for an amount equal to or more than Rs. 2 lakh after 3.00 p.m. at the Official Point(s) of Acceptance and where the funds for the entire amount of subscription/purchase as per the application are credited to the bank account

- Irrespective of the time of receipt of applications for an amount equal to or more than Rs. 2 lakh at the Official Point(s) of Acceptance, where the funds for the entire amount of subscription/purchase as per the application are credited to the bank account of the Scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on any subsequent Business Day - the closing NAV of such subsequent Business Day shall be applicable.

ii) For Switch-ins:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription/purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time.
- The funds are available for utilization before the cut-off time.

Where application is received after the cut-off time on a day but the funds are cleared on the same day, the closing NAV of the next Business Day shall be applicable.

For investments of an amount equal to or more than Rs. 2 lakh through systematic investment routes such as Systematic Investment Plans (SIP), Flex Systematic Investment Plans (Flex SIP), Systematic Transfer Plans (STP), Flex-STP, Swing STP, FLEXINDEX Plan, the units will be allotted as per the closing NAV of the day on which the funds are available for utilization by the Target Scheme.

All multiple applications for investment at the Unit holders' PAN and holding pattern level in a Scheme (irrespective of amount or the plan/option/sub-option) received on the same Business Day, will be aggregated to ascertain whether the total amount equals to Rs. 2 lakh or more and to determine the applicable Net Asset Value. Transactions in the name of minor received through guardian will not be aggregated with the transaction in the name of same guardian. The AMC may have additional criteria for aggregation of multiple transactions. The criteria for aggregation of multiple transactions shall be as decided by the AMC at its sole discretion from time to time.

C] For Redemption (including switch-out) applications:

- In respect of valid applications received upto 3.00 p.m. on a Business Day by the Fund, same day's closing NAV shall be applicable.
- In respect of valid applications received after 3.00 p.m. on a Business Day by the Fund, the closing NAV of the next Business Day shall be applicable.

Transactions through online facilities / electronic modes:

The time of transaction done through various online facilities / electronic modes offered by the AMC, for the purpose of determining the applicability of NAV, would be the time when the request for purchase / sale / switch of units is received in the servers of AMC/RTA.

In case of transactions through online facilities / electronic modes, there may be a time lag of upto 5-7 banking days between the amount of subscription being debited to investor's bank account and the subsequent credit into the respective Scheme's bank account. This lag may impact the applicability of NAV for transactions where NAV is to be applied based on actual realization of funds by the Scheme. Under no circumstances will HDFC Asset Management Company Limited or its bankers or its service providers be liable for any lag / delay in realization of funds and consequent pricing of units.

Transaction requests received through mailing services:

Investors are requested to note that in case of application/transaction forms sent through mailing services such as Post, Courier, etc., the time of receipt for determining the applicability of NAV, would be the time when the request for purchase / sale / switch of units is actually time stamped at the Official Point(s) of Acceptance (OPA). Thus, there may be a time lag between the receipt of such application/transaction forms at OPA and the actual time stamping of the same in accordance with the regulatory requirements. This lag may impact the applicability of NAV for such transactions as per the applicable cut-off timing guidelines. Under no circumstances will HDFC AMC/the Fund or its service providers be liable for the same.

The AMC has the right to amend cut off timings subject to SEBI (MF) Regulations for the smooth and efficient functioning of the Scheme.

4) Dividend Policy (All schemes except HDFC Index Fund and HDFC Gold Fund)

It is proposed to declare dividends subject to availability of distributable surplus, as computed in accordance with SEBI (Mutual Funds) Regulations, 1996.

Dividends, if declared, will be paid (subject to deduction of tax at source, if any) to those Unitholders / Beneficial Owners whose names appear in the Register of Unit holders maintained by the Mutual Fund/ statement of beneficial ownership maintained by the Depositories, as applicable, under the Dividend option as on the Record Date. The Dividend Warrants shall be despatched within 30 days of the declaration of the dividend. In the event of failure of dispatch of dividend within the stipulated 30 day period, the AMC shall be liable to pay interest @ 15 per cent per annum to the unit holders. The AMC reserves the right to change the record date from time to time. However, it must be distinctly understood that the actual declaration of dividend and the frequency thereof will inter alia, depend on the availability of distributable surplus as computed in accordance with SEBI (Mutual Funds) Regulations, 1996. The decision of the Trustee in this regard shall be final.

There is no assurance or guarantee to unit holders as to the rate of dividend distribution nor that dividends will be paid regularly. On payment of dividends, the NAV will stand reduced by the amount of dividend and dividend tax (if applicable) paid.

5) Load Structure

- (i) No exit load shall be levied for switching between Options under the same Plan within a Scheme.
- (ii) Switch of investments to Direct Plan within the same Scheme shall be subject to applicable exit load, **unless** the investment was made **directly** i.e. without any distributor code. However, any subsequent switch-out or redemption of such investments from the Direct Plan will not be subject to any exit load.

Information common to Schemes (as applicable) (Contd.)

- (iii) No exit load shall be levied for switch-out from Direct Plan to the non-Direct Plan within the same Scheme. However, any subsequent switch-out or redemption of such investment from the non-Direct Plan shall be subject to exit load based on the **original date of investment** in the Direct Plan.
 - (iv) Switch of investments between Plans under a Scheme having separate portfolios, will be subject to applicable exit load.
 - (v) No exit load will be levied on Bonus Units and Units allotted on Dividend Re-investment.
 - (vi) No exit load will be levied on Units allotted in the Target Scheme under the Dividend Transfer Plan.
- Note: Switches/Redemptions are subject to completion of lock-in period, if any, under the Scheme(s).

The AMC / Trustee reserve the right to send any communication in physical mode.

11. Mode of Payment of Redemption / Dividend Proceeds-via Direct Credit / NEFT / ECS

• Real Time Gross Settlement (RTGS)/National Electronic Funds Transfer (NEFT)

The AMC provides the facility of 'Real Time Gross Settlement (RTGS)' and 'National Electronic Funds Transfer (NEFT)' offered by Reserve Bank of India (RBI), which aims to provide credit of redemption and dividend payouts (if any) directly into the bank account of the Unit holder maintained with the banks (participating in the RTGS/ NEFT System).

NEFT is electronic fund transfer modes that operate on a deferred net settlement (DNS) basis which settles transactions in batches. Contrary to this, in RTGS, transactions are processed continuously throughout the RTGS business hours. The minimum amount to be remitted through RTGS is Rs. 2 lakhs. There is no upper ceiling for RTGS transactions. No minimum or maximum stipulation has been fixed for NEFT transactions.

Unit holders can check the list of banks participating in the RTGS / NEFT System from the RBI website i.e. www.rbi.org.in or contact any of our Investor Service Centres. However, in the event of the name of Unit holder's bank not appearing in the 'List of Banks participating in RTGS/ NEFT updated on RBI website www.rbi.org.in, from time to time, the instructions of the Unit holder for remittance of redemption/ dividend (if any) proceeds via RTGS / NEFT System will be discontinued by Fund / AMC without prior notice to the Unit holder and the payouts of redemption / dividend (if any) proceeds shall be effected by sending the Unit holder(s) a cheque/ demand draft.

INSTRUCTIONS (Contd.)

For more details on RTGS / NEFT or for frequently asked questions (FAQs) on RTGS / NEFT, Unit holders are advised to visit the RBI website www.rbi.org.in/Fund website www.hdfcfund.com

• Direct Credit

The AMC has entered into arrangements with eleven banks to facilitate direct credit of redemption and dividend proceeds (if any) into the bank account of the respective Unit holders maintained with any of these banks. These banks are: Axis Bank Ltd., Citibank N.A., Deutsche Bank AG, HDFC Bank Limited, The Hongkong and Shanghai Banking Corporation, ICICI Bank Limited, IDBI Bank Limited, Kotak Mahindra Bank Ltd., Standard Chartered Bank and YES Bank Limited. The list of banks is subject to change from time to time.

• Electronic Clearing Service (ECS)

Investors who have opted for the ECS facility of RBI for dividend payment will receive a direct credit of the due amount in the mandated bank account whenever the payment is made through ECS. A separate advice regarding credit of amount(s) via ECS will be sent to the Unit holder. It should be noted that while the Fund will make all efforts, there is no commitment that this facility will be made available to all desirous investors.

Applicants in cities not covered under ECS facility will receive dividend payments, if any by cheques or demand drafts and the same will be mailed to the Unit holders. Please note that the ECS Facility is available only in respect of dividend payments and not in the case of Redemption of Units.

Therefore, in the absence of a specific request from the Unit holder exercising their choice of the mode of payment offered by the Fund from time to time, the payment of redemption / dividend proceeds shall be effected via the RTGS / NEFT mechanism only.

Where this payment mode is not feasible / available, the payment of such proceeds will be made by DC / DD as may be feasible.

Unit holders are advised to opt for the NEFT / RTGS, as it helps in avoiding loss of dividend/ redemption warrant in transit or fraudulent encashment. Please update your IFSC and MICR Code in order to get payouts via electronic mode in to your bank account.

The AMC / Fund shall not be held liable for any losses/ claims, etc. arising on account of processing the direct credit or credit via RTGS/NEFT / ECS of redemption / dividend proceeds on the basis of Bank Account details as provided by the Unit holder in the Application Form.

However, if the Unit holders are not keen on availing of any of the said facilities and prefer receiving demand drafts, Unit holders may indicate their intention in the Application Form in the space provided specifically. The AMC/Fund would then ensure that the payouts are effected by sending the Unit holders a demand draft. In case of unforeseen circumstances, the AMC/Fund reserves the right to issue a demand draft.

Any charges levied by the investor's bank for receiving payment through electronic mode will be borne by the investor. The Mutual Fund / AMC will not accept any request for refund of such bank charges.

• Mode of Payment for Unit holders holding Units in Demat form

Investors will receive their redemption payout/ dividend proceeds directly into their bank accounts linked to the demat accounts. Please ensure to furnish the Bank Account details under **Section 8**.

- c. At any given point in time, the subsequent Flex SIP instalment amount determined by the above formula shall be capped at 2 times the first Flex SIP instalment amount or Rs.1,99,999/- whichever is lower. The instalment amount shall be rounded off to nearest multiple of Re. 1/-.

C. **Illustration 1:** How would the Flex SIP instalment be calculated?

Flex SIP Enrolment Details:

Scheme Name	: HDFC Equity Fund - Growth Option ("the Scheme")
Instalment Date & Frequency of Flex SIP	: 15th of every month (T)
Fixed Instalment Amount	: Rs. 5000/-
Number of Instalments	: 36
Total Enrolment Amount	: Rs 5000 X 36 = Rs 1,80,000
Period	: January 2018 to December 2020

Calculation of Flex SIP instalment amount for instance on the date of the fourth instalment i.e. April 15, 2018 (T):

- Total units allotted upto the date of previous instalment i.e. March 15, 2018 is assumed as 685.50;
- The NAV of the Scheme on April 13, 2018 (T-2) is assumed as Rs. 18/- per unit;
- Hence the market value of the investment in the Scheme on April 13, 2018 is Rs. 12,339 [685.50 X 18].

The instalment amount will be calculated as follows:

Fixed amount specified at the time of enrolment	: Rs. 5,000/-
	or
As determined by the formula	: $[(5,000 \times 4) - 12,339.00] = Rs. 7,661.00$
whichever is higher	

Hence, the instalment amount on April 15, 2018 will be Rs. 7,661.00

Illustration 2: How would maximum Flex SIP instalment be calculated?

Calculation of Flex SIP instalment amount for instance on the date of the seventh instalment i.e. July 15, 2018 (T):

- Total units allotted upto the date of previous instalment i.e. June 15, 2018 is assumed as 1,558.675;
- NAV of the Scheme on July 13, 2018 (T-2) is assumed as Rs. 14/- per unit;
- Hence the market value of the investment as on July 13, 2018 is Rs. 21,821 [1558.675 X 14].

The instalment amount will be calculated as follows:

Fixed amount specified at the time of enrolment	: Rs. 5,000/-
	or
As determined by the formula	: $[(5,000 \times 7) - 21,821.00] = Rs. 13,179.00$
whichever is higher; subject to 2 times the initial instalment amount	

Hence, the instalment amount on July 15, 2018 amount will be Rs. 10,000/-

Thus this Flex SIP facility helps to buy more units when the NAVs are lower. HDFC Flex SIP in any manner whatsoever is not an assurance or promise or guarantee on part of HDFC Mutual Fund/ HDFC Asset Management Company Limited to the Unit holders in terms of returns or capital appreciation or minimization of loss of capital or otherwise.

Illustration 3: How would the total enrolment amount under Flex SIP be calculated?

As per the details of Flex SIP provided in the above illustration, the total enrolment amount for Flex SIP will be equal to Rs 1,80,000 (5000 X 36 months).

If the total amount invested in Flex SIP till the 34th month is Rs 1,77,000, then the 35th instalment will be Rs. 3000 (Rs. 1,80,000 – Rs. 1,77,000) and the Flex SIP will cease.

Note: The dates in the illustrations above are assumed to be Business Days. The above illustrations are for understanding purpose only. The amount for subsequent instalments (i.e. instalments after the 1st instalment) will be calculated based on the market value of the investment 2 days before the Instalment date (T). However, the instalment will be processed on SIP debit date subject to applicable NAV as per cut-off timing guidelines.

D. An investor has an option to choose from 5 Flex SIP tenures viz. 3 years, 5 years, 10 years, 15 years and 20 years. If a tenure is not chosen, 5 years shall be the default Flex SIP tenure.

E. The facility offers Monthly Flex Systematic Investment Plan (MFLEX) and Quarterly Flex Systematic Investment Plan (QFLEX) frequencies. In case the frequency is not indicated, Monthly frequency shall be treated as the Default Frequency.

	Schemes other than HDFC TaxSaver*	HDFC TaxSaver*
i) Minimum Amount per Instalments		
MFLEX	Rs. 500/- and in multiples of Rs. 100/-	Rs. 500/- and in multiples of Rs. 500/-
