Features	HSBC ULTRA SHORT TERM BOND FUND		
Type	An open ended Debt Scheme		
Investment Objective	Seeks to provide liquidity and reasonable returns by investing primarily in a mix of short term debt and money market instruments.		
Date of Inception	17 October, 2006		
Asset Allocation Pattern	Please refer to page 4		
Investment Strategy	The aim of the Investment Manager will be to allocate the assets of the Scheme between various money market and fixed income securities (predominantly short duration instruments) with the objective of providing liquidity and achieving optimal returns with the surplus funds. Since providing liquidity is of paramount importance, the focus will be to ensure liquidity while seeking to maximise the yield. An appropriate mix of money market and debt instruments will be used to achieve this. Liquidity will be maintained through a combination of cash, reverse repo, daily put / call MIBOR papers and liquid CPs / CDs of strong credits. As compared to a liquid fund, the higher portfolio maturity would mean higher allocation to 6-12 months instruments and a mix of structured credits in the 1 year segment as well as moving down the credit curve to improve yield. The fund could run a mark to market component slightly higher than a liquid fund (whose regulatory maximum is 10%) but sharply lower than an STP (in the region of 40-60%).		
Risk Profile	Mutual Fund units involve investment risks including the possible loss of principal. Please read the Combined SID carefully for details on risk factors before investment. Please refer to page 13 for the summarized scheme Specific Risk Factors under "Common features for all Schemes"

Type	An open-ended Liquid Scheme	An open-ended Debt Scheme														
Investment Objective	Aim is to provide reasonable returns, commensurate with low risk while providing a high level of liquidity, through a portfolio of money market and debt securities. However there can be no assurance that the scheme objective can be realised.	To deliver returns in the form of interest income and capital gains, along with high liquidity, commensurate with the current view on the markets and the interest rate cycle, through active investment in debt and money market instruments.														
Date of Inception	4 December, 2002	5 October, 2007														
Asset Allocation Pattern	Please refer to page 4	Please refer to page 4														
Investment Strategy	Since providing liquidity is of paramount importance, the focus will be to ensure liquidity while seeking to maximise the yield. An appropriate mix of money market and debt instruments will be used to achieve this. The Fund may invest a part of the portfolio in various debt securities issued by corporates and / or State and Central Government.	The Scheme can invest across all classes of fixed income instruments. There will be no cap or floor on maturity, duration or instrument type concentrations. The Fund Manager, depending on the interest rates view has the flexibility to allocate the funds in any fixed income instrument and endeavour to provide yields in line with the current market scenario. The Fund aims to optimise returns for the investors by designing a portfolio, which will dynamically track interest rate movements in the short term by reducing duration in a rising rate environment while increasing duration in a falling interest rate environment. The investment strategy would revolve around structuring the portfolio with an aim to capture positive price movements and minimise the impact of adverse price movements.

Scheme Specific Risk Factors**Risk factors associated with investing in Equity or Equity related Securities**

● Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both macro and micro factors. ● Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme(s) to make intended securities' purchases due to settlement problems could cause the Scheme(s) to miss certain investment opportunities. In the view of the Fund Manager, investing in Mid and Small Cap stocks are riskier than investing in Large Cap Stocks. ● To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, exchange controls, settlements, restrictions on repatriation and transaction procedures in overseas market. ● The Scheme(s) at times may receive large number of redemption requests which may have an adverse impact on the performance of the Scheme(s) and may also affect all the unit holders as the fund manager needs to liquidate securities to meet the redemptions post which the portfolio is likely to be less liquid.

Restructuring / Rescheduling Risk

There could be cases of restructuring / re-scheduling of particular debt / money market instruments held in the portfolio which could result in the maturity of these instruments going beyond the original maturity date of the instrument. In such cases the fund manager may be constrained to sell these instruments in the market at realizable value and pass on the loss / impact to investors under the Scheme.

Risk factors associated with investing in Fixed Income Securities

Subject to the stated investment objective, the Scheme(s) propose to invest in debt and related instruments.

● **Price-Risk or Interest Rate Risk:** As with all debt securities, changes in interest rates may affect the NAV of the Scheme(s) as the prices of securities increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV. In the case of floating rate instruments, an additional risk could be due to the change in the spreads of floating rate instruments. If the spreads on floating rate papers rise, then there could be a price loss on these instruments. Secondly in the case of fixed rate instruments that have been swapped for floating rates, any adverse movement in the fixed rate yields vis-à-vis swap rates could result in losses. However, floating rate debt instruments which have periodical interest rate reset, carry a lower interest rate risk as compared to fixed rate debt instruments. In a falling interest rate scenario the returns on floating rate debt instruments may not be better than those on fixed rate debt instruments.

● **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.

● **Credit Risk:** Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e. will be unable to make timely principal and interest payments on the security). Because of this risk, corporate debentures are sold at a yield above those offered on Government Securities, which are sovereign obligations. Normally, the value of a fixed income security will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk. ● **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme(s) are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. ● **Duration Risk:** Duration is a risk measure used to measure the bond / security price changes to potential changes in interest rates. Duration of portfolio x the expected changes in rates = the expected value change in the portfolio. Duration is more scientific measure of risk compare to average maturity of the portfolio. The higher the duration of the portfolio, the greater the changes in value (i.e. higher risk) to movement in interest rates. Modified duration is the duration of a bond / security given its current yield to maturity, put / call feature, and an expected level of future interest rates. ● **Benchmark Risk:** The floating rate segment of the domestic debt market is not very developed. Currently, majority of the issuance of floating rate papers is linked to NSE MIBOR. As the floating rate segment develops further, more benchmark rates for floating papers may be available in future. The fewer number of benchmark rates could result in limited diversification of the benchmark risk. Different types of securities in which the scheme(s) would invest as given in the Combined Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government Securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. ● **Prepayment Risk:** The risk associated with the early unscheduled return of principal on a fixed-income security. The early unscheduled return of principal may result in reinvestment risk. ● **Short Selling Risk:** The risk associated with upward movement in market price of security sold short may result in loss. The losses on short position may be unlimited as there is no upper limit on rise in price of a security.

Risks associated with Investing in Derivatives

● The Fund may use derivative instruments like stock index futures, option on stocks, stock indices, interest rate swaps, forward rate agreements or other derivative instruments as permitted under the Regulations and guidelines. As and when the Scheme(s) trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialised instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Also, the market for derivative instruments is nascent in India and so liquidity risk is also pretty high. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be perused by the fund manager involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risks associated with Investing in Securitised Debt

Securitised Debt: Securitised debt papers carry credit risk of the Obligor and are dependent on the servicing of the PTC / Contributions etc. However these are offset suitably by appropriate pool selection as well as credit enhancements specified by Rating Agencies. In cases where the underlying facilities are linked to benchmark rates, the securitised debt papers may be adversely impacted by adverse movements in benchmark rates. However this risk is mitigated to an extent by appropriate credit enhancement specified by rating agencies. Securitised debt papers also carry the risks of prepayment by the obligors. In case of prepayments of securities debt papers, it may result in reduced actual duration as compared to the expected duration of the paper at the time of purchase, which may adversely impact the portfolio yield. These papers also carry risk associated with the collection agent who is responsible for collection of receivables and depositing them. The underlying assets in the case of investment in securitised debt could be mortgages or other assets like credit card receivables, automobile/ vehicle / personal / commercial/ corporate loans and any other receivables/ loans / debt.

The Risks associated with the underlying assets can be described as under:

Credit card receivables are unsecured. Automobile / vehicle loan receivables are usually secured by the underlying automobile / vehicle and sometimes by a guarantor. Mortgages are secured by the underlying property. Personal loans are usually unsecured. Corporate loans could be unsecured or secured by a charge

on fixed assets / receivables of the company or a letter of comfort from the parent company or a guarantee from a bank / financial institution. As a rule of thumb, underlying assets which are secured by a physical asset / guarantor are perceived to be less risky than those which are unsecured. By virtue of this, the risk and therefore the yield in descending order of magnitude would be credit card receivables, personal loans, vehicle / automobile loans, mortgages and corporate loans assuming the same rating.

Risks associated with Securities Lending

Securities Lending: The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the approved intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme(s) and the approved intermediary.

Risk associated with legal, tax and regulatory risk factors

The schemes of the Fund could be exposed to changes in legal, tax and regulatory regime which may adversely affect it and / or the investors. Such changes could also have retrospective effect and could lead to additional taxation imposed on the schemes which was not contemplated either when investments were made, valued or disposed off.

Load Structure

Entry Load

In accordance with the requirements specified by the SEBI circular no. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009, no entry load will be charged for purchase / additional purchase / switch-in accepted by the Fund with effect from August 1, 2009. Similarly, no entry load will be charged with respect to applications for registrations under HSBC Systematic Investment Plan / HSBC Systematic Transfer Plan accepted by the Fund with effect from August 1, 2009. The upfront commission on investment made by the investor, if any, shall be paid to the ARN Holder (AMFI registered Distributor) directly by the investor, based on the investor's assessment of various factors including service rendered by the ARN Holder.

Exit Load / Contingent deferred Sales Charge ('CDSC')

No exit load shall be charged to the investors on the redemptions / switch outs in any of the schemes of the Fund. However, this change is applicable only for the prospective investments made in the schemes of the Fund effective March 1, 2013.

Compliance under Foreign Account Tax Compliance Act (FATCA)

The India has executed an Inter-Governmental Agreement (IGA) with the U.S. and the Fund intends to take any measures that may be required to ensure compliance under the terms of the IGA and local implementing regulations. In order to comply with its FATCA obligations, the Fund will be required to obtain certain information from its investors so as to ascertain their U.S. tax status. If the investor is a specified U.S. person, U.S. owned non-U.S. entity, non-participating FFI ("NPFPI") or does not provide the requisite documentation, the Fund may need to report information on these investors to the appropriate tax authority, as far as legally permitted. If an investor or an intermediary through which it holds its interest in the Fund either fails to provide the Fund its agents or authorised representatives with any correct, complete and accurate information that may be required for the Fund to comply with FATCA or is a NPFPI, the investor may be subject to withholding on amounts otherwise distributable to the investor, may be compelled to sell its interest in the Fund or, in certain situations, the investor's interest in the Fund may be sold involuntarily. The Fund may at its discretion enter into any supplemental agreement without the consent of investors to provide for any measures that the Fund deems appropriate or necessary to comply with FATCA, subject to this being legally permitted under the IGA or the Indian laws and regulations. Other countries are in the process of adopting tax legislation concerning the reporting of information. The Fund also intends to comply with such other similar tax legislation that may apply to the Fund although the exact parameters of such requirements are not yet fully known. FATCA is globally applicable from July 1, 2014 and in order to comply with FATCA obligations, the Fund will, seek additional information from investors while accepting applications, in order to ascertain their U.S. tax status. The Fund will not accept applications which are not accompanied with information / documentation required to establish the U.S. tax status of investors. Investors are therefore requested to ensure that the details provided under Section "Confirmation under Foreign Account Tax Compliance Act (FATCA) for determining US person status" of the application form are complete and accurate to avoid rejection of the application (updated forms are available with ISCs or on Fund's website – www.assetmanagement.hsbc.com/in).

Investors should consult their own tax advisors regarding the FATCA requirements with respect to their own situation. In the event of any conflict or inconsistency between any of these Terms and Conditions and those in any other service, product, business relationship, account or agreement between investor and HSBC, these terms shall prevail, to the extent permissible by applicable local law. If all or any part of the provisions of these Terms and Conditions become illegal, invalid or unenforceable in any respect under the law of any jurisdiction, that shall not affect or impair the legality, validity or enforceability of such provision in any other jurisdictions or the remainder of these Terms and Conditions in that jurisdiction. These Terms and Conditions shall continue to apply notwithstanding the death, bankruptcy or incapacity of the investor, the closure of any investor account, the

termination of HSBC's provision of the Services to the investor or the redemption of the investor's investment in the Fund.

Common Reporting Standards

India has joined the Multilateral Competent Authority Agreement (MCAA) on automatic exchange of financial information in Tax Matters, commonly known as Common Reporting Standards ('CRS'). All countries which are signatories to the MCAA are obliged to exchange a wide range of financial information after collecting the same from financial institutions in their jurisdiction.

In accordance with Income Tax Act read with SEBI Circular nos. CIR/MIRSD/2/2015 dated August 26, 2015 and CIR/MIRSD/3/2015 dated September 10, 2015 regarding implementation of CRS requirements, it shall be mandatory for all new investors to provide details and declaration pertaining to CRS in the application form, failing which the AMC shall have authority to reject the application.

Compliance with Volcker Rule

The Volcker Rule is a part of the U.S. Dodd Frank Act which prohibits U.S. banks from proprietary trading and restricts investment in hedge funds and private equity by commercial banks and their affiliates. HSBC Holdings plc, is a U.S. regulated bank holding company and any entity (company, fund, trust, partnership etc.) located anywhere in the world, that is directly or indirectly controlled by the parent company is subject to the Volcker Rule. The Volcker Rule is effective from July 21, 2015.

As part of HSBC's Volcker Conformance obligations, the Fund is required to implement a Compliance Programme to ensure on-going compliance with the Volcker Rule and the AMC must ensure that no HSBC affiliate (fund or business entity) invests in the Fund unless it has implemented necessary controls to ensure that the ownership limits, in line with the Volcker Rule, can be met. Hence, the Fund may not be able to accept subscriptions from HSBC group entities into the schemes of the Fund, aggregating to more than 4.9% of the voting rights of a scheme or more than 19.9% of the assets under management of any scheme. In the event of the aggregate investment by HSBC group entities crossing the above limits, the Fund will have the discretion to reject any subscription/switch applications received or redeem any excess exposure by the group entities in the Fund, to be in compliance with the Volcker Rule.

Tax Benefits of Investing in the Mutual Fund

Investors are advised to refer to the Section on "Taxation on investing in Mutual Funds" in the Statement of Additional Information and also is advised to consult with his or her own tax consultant with respect to the specific tax implications arising out of their participation in the scheme(s).

Notwithstanding anything contained in the SAI, Combined Scheme Information Document and Common Key Information Memorandum of the Scheme(s) the provisions of SEBI (Mutual Funds) Regulations, 1996 and Guidelines thereunder shall be applicable. Investors can also obtain further changes after the date of this Common Key Information Memorandum from the Mutual Fund / Investor Service Centres or distributors.

Important Instructions

- 1) Please refer to the Combined SID, SAI and the Common KIM carefully before filling the Application Form.
- 2) Please refer the sections on "Who can invest" and "Who cannot invest" for a list of eligible investors in the combined SID. Applications from US Person or Canada residents will not be accepted.
- 3) All applicants are deemed to have accepted the terms subject to which this offer is being made and bind themselves to the terms upon signing the Application Form and tendering the payment.

- 4) Investors are requested to use the services of AMFI certified Distributors empanelled with the AMC. The AMC shall not be liable to an Investor, with respect to investments made through non-empanelled Distributors.

If the investor wishes to invest directly, i.e. without involving the services of any agent or broker, "DIRECT" should be mentioned in the space provided for "ARN Number" in the Application Form / Transaction Form. Any subsequent change / updation / removal of broker code will be based on the written request from the Unit holder and will be on a prospective basis only from the date when the Registrar executes such written instruction.

Employee Unique Identification Number (EUIIN): SEBI circular CIR/IMD/DF/21/2012 dated September 13, 2012, required creation of a unique identity number of the employee / relationship manager / sales person of the distributors interacting with the investor for the sale of mutual fund products, in addition to the AMFI Registration Number (ARN) of the distributor. This has been recommended by SEBI in order to avoid any instance of mis-selling, particularly in advisory based transactions. This would further help tackle the problem of mis-selling even if the employee / relationship manager / sales person leave the employment of the distributor. Due to this regulatory change, all employees of distributors who are involved in sale of mutual fund products are required to obtain an Employee Unique Identification Number (EUIIN). Applications received without a valid EUIIN and / or valid sub-broker code(should be a valid ARN and not an internal code) are subject to rejection by the fund.

The IPV carried out by one SEBI registered intermediary can be relied upon by another intermediary. It is also stated that, in case of Mutual Funds, the Asset Management Companies (AMCs) and the distributors who comply with the certification process of National Institute of Securities Market (NISM) or Association of Mutual Funds (AMFI) and have undergone the process of 'Know Your Distributor (KYD)', can perform the IPV. If photocopies are submitted, investors must produce original for verification.
4. Bank account registration/deletion request will be accepted and processed only if all the details are correctly filled and the necessary documents are submitted. The request is liable to be rejected if any information is missing or incorrectly filled or if there is deficiency in the documents submitted.
