# **TYPE AND CATEGORY OF SCHEME**

| Name of the Scheme | Motilal Oswal Liquid Fund (MOFLF) |
|--------------------|-----------------------------------|
| Type of the Scheme | An open ended liquid fund         |
| Category of Scheme | Liquid Fund                       |

# **INVESTMENT OBJECTIVE**

The investment objective of the Scheme is to generate optimal returns with high liquidity to the investors through a portfolio of money market securities.

However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

# ASSET ALLOCATION

The asset allocation pattern of the Scheme would be as follows:

| Instrument   | Allocations<br>(% of total assets) | Risk Profile<br>High/Medium<br>/ Low |
|--|------------------------------------|--------------------------------------|
| CBLO, Treasury Bills, Cash Management Bills and<br>Commercial Deposits of Scheduled Commercial Banks |                                    | Low                                  |
| having maturity upto 91 days only  |                                    |                                      |

Pursuant to SEBI circular no. SEBI/IMD/CIR No. 13/150975/09 dated January 19, 2009, the Scheme shall make investment in / purchase debt and money market securities with maturity of up to 91 days only. In case of securities with put and call options (daily or otherwise) the residual maturity shall not be greater than 91 days.

Explanation:

- 1. In case of securities where the principal is to be repaid in a single payout, the maturity of the securities shall mean residual maturity. In case the principal is to be repaid in more than one payout then the maturity of the securities shall be calculated on the basis of weighted average maturity of security.
- 2. In case the maturity of the security falls on a non-business day then settlement of securities will take place on the next business day.

The Scheme retains the flexibility to invest across all the securities in the debt and Money Market Instruments as per investment objectives of the Scheme and as per the SEBI Regulations. The Scheme may also invest in units of debt and liquid mutual fund schemes. Money Market Instruments include CMBs, T-Bills, and Government securities with an unexpired maturity upto one year, CBLOs & Repo/ Reverse Repo. The scheme will not invest in Securitised debt, foreign securities, corporate repo & reverse repo and derivatives.

The Scheme may engage in Short Selling of securities in accordance with the framework relating to Short Selling and securities lending and borrowing specified by SEBI. The Scheme may also engage in Securities Lending wherein the Scheme shall not deploy more than 20% of its net assets in securities lending and not more than 5% of the net assets of the Scheme will be deployed in securities lending to any single counterparty.

# **Change in Asset Allocation**

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only. In case of deviation, the portfolio would be rebalanced within 30 days from the date of deviation. In case the same is not aligned to the above asset allocation pattern within 30 days, justification shall be provided to the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action.

# **INVESTMENT STRATEGY**

The Fund Management team will endeavour to maintain a consistent performance in the scheme, giving utmost importance to safety & liquidity of the investments. The fund manager will try to achieve an optimal risk return balance for management of the portfolio. The investments in money market instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, efforts will be made to minimize the volatility by diversification and effective use of hedging techniques. The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets.

# **RISK PROFILE OF THE SCHEME**

Mutual Fund units involve risks including the possible loss of principal. Please read Scheme Information Document (SID) carefully for details on risk factors before investment. Scheme Specific Risk factors are summarized below:

# • Market Risk

The Scheme's NAV will react to the interest rate movements. The Investor may lose money over short or long period due to fluctuation in Scheme's NAV in response to factors such as economic and political developments, changes in interest rates, inflation and other monetary factors and also movement in prices of underlining investments.

# • Regulatory Risk

Any changes in trading regulations by NSE or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.

# Asset Class Risk

The returns from the types of securities in which the Scheme invests may under perform from the various general securities markets or different asset classes. Different types of securities in which the scheme would invest as given in the SID carry different levels and types of risk. Different types of

securities tend to go through cycles of out-performance and under-performance in comparison with the general securities markets. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern.

# • Interest Rate Risk

Changes in interest rates will affect the Scheme's Net Asset Value. The prices of securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by modified duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing securities. Prices of long-term securities generally fluctuate more in response to interest rate changes than short-term securities. The price risk is low in the case of the floating rate or inflation-linked bonds. The price risk does not exist if the investment is made under a repo agreement. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Modified Duration is a measure of price sensitivity, the change in the value of investment to a 1% change in the yield of the investment.

# • Reinvestment Risk

Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

# • Pre-payment Risk

Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

# • Spread Risk

In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

# • Settlement Risk

Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well-developed and liquid secondary market for debt securities, may result at times in potential losses to the Scheme in the event of a subsequent decline in the value of securities held in the Scheme's portfolio.

# • Risks associated with investing in CBLO Segments

The mutual fund is a member of securities and CBLO segments of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in CBLO segments are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time. In the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund allocated to the scheme on a pro-rata basis.

# • Credit Risk

Credit Risk means that the issuer of a security may default on interest payments or even paying back the principal amount on maturity. (i.e. the issuer may be unable to make timely principal and interest payments on the security). Even where no default occurs, the prices of security may go down because the credit rating of an issuer goes down. It must be, however, noted that where the Scheme has invested in Government securities, there is no risk to that extent.

# • Liquidity or Marketability Risk

This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading Volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Fund for redemption of units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme.

# Risk factors associated with Securities Lending

Stock Lending is a lending of securities through an SEBI approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.

In case the Scheme undertakes stock lending as prescribed in the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Unitholders of the Scheme should note that there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities lent. The Fund may not be able to sell such lent securities and this can lead to temporary illiquidity.

# • Risks associated with short selling

Scheme may enter into short selling transactions, subject to SEBI and RBI regulations in the matter. This will be done if the fund management team is of the view that there exists an opportunity to make trading gains. Calls for short selling will be taken after considering the liquidity, price movement & volatility of the security by the fund management team. There can be a loss in such a transaction if the price of the security goes up instead of falling down.

# • Right to Limit Redemptions

The Trustee, in the general interest of the unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day subject to the guidelines/circulars issued by the Regulatory Authorities from time to time.

# • Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

# **Risk Control**

Risk is an inherent part of the investment function. Effective Risk management is critical to fund management for achieving financial soundness. Investment by the Scheme would be made as per the investment objective of the Scheme and in accordance with SEBI Regulations. AMC has adequate safeguards to manage risk in the portfolio construction process. Risk control would involve managing risk in order to keep in line with the investment objective of the Scheme. The risk control process would include identifying the risk and taking proper measures for the same. The system has incorporated all the investment restrictions as per the SEBI guidelines and enables identifying and measuring the risk through various risk management tools like various portfolio analytics, risk ratios, average duration and analyses the same and acts in a preventive manner.

# PLANS AND OPTIONS

The Scheme offers two Plans: Regular Plan and Direct Plan.

**Regular Plan** is for Investors who purchase/subscribe units in a Scheme through any Distributor (AMFI Registered Distributor/ARN Holder).

**Direct Plan** is for investors who purchase/subscribe units in a Scheme directly with the Fund and is not routed through a Distributor (AMFI Registered Distributor/ARN Holder).

Each Plan offers Growth Option.

# **Growth Option:**

Under this Option, dividend will not be declared. Income/profits received/earned on the Scheme's corpus would be accumulated by the Fund as capital accretion & will remain invested in the Scheme and will be reflected in the Net Asset Value (NAV) of Units under this Option.

The AMC reserves the right to introduce/discontinue further Plans / Options as and when deemed fit.

# Transaction through Stock Exchange:

With respect to investors who transact through the stock exchange, Applicable NAV shall be reckoned on the basis of the time stamping as evidenced by confirmation slip given by stock exchange mechanism.

# METHODOLOGY AND ILLUSTRATION OF SALE AND REPURCHASE OF UNITS

# a) Methodology of calculating sale price

The price or NAV, an investor is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular dated June 30, 2009, no entry load will be charged by the scheme to the investors. Therefore, Sale or Subscription price = Applicable NAV (for respective plan and option of the scheme)

Example: An investor invests Rs.10,000/- and the current NAV is Rs. 10/- then the purchase price will be Rs.10/- and the investor receives 10,000/10 = 1000 units.

# b) Methodology of calculating repurchase price of Units

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the investors. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the "Applicable NAV" to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV \*(1- Exit Load, if any)

Example: If the Applicable NAV is Rs. 10 and a 2% Exit Load is charged, the Redemption Price per Unit will be calculated as follows: = Rs. 10 \* (1-0.02) = Rs. 10 \* (0.98) = Rs. 9.80.

# MINIMUM APPLICATION AND REDEMPTION AMOUNT

Minimum Application Amount: Rs. 500/- and in multiples of Re. 1/- thereafter.

Minimum Additional Amount: Rs. 500/- and in multiples of Re. 1/- thereafter.

**Minimum Redemption Amount:** Minimum of Rs. 500/- and in multiples of Re. 1/- thereafter or account balance whichever is lower.

# DESPATCH OF REPURCHASE (REDEMPTION) REQUEST

# D. Motilal Oswal Value Index (MOVI) Pack Plan

Motilal Oswal Value Index (MOVI) Pack Plan is a Systematic Transfer Plan (STP) from select debt/liquid scheme into select equity scheme that enables allocation between debt and equity asset classes. It allows Unit holders holding units in non-demat form to take advantage of fluctuations in equity market valuations and not just market levels based on MOVI. Under this facility, Investors may opt to transfer amounts from Motilal Oswal Liquid Fund (referred to as Transferor Scheme) to Motilal Oswal Focused 25 Fund, Motilal Oswal Midcap 30 Fund, Motilal Oswal Multicap 35 Fund, Motilal Oswal Dynamic Fund and Motilal Oswal Equity Hybrid Fund (referred to as Transferee Scheme) with allocations based on MOVI levels. The transfers will be enabled in the reverse as well.

The Salient features of the Plan are as under:

- A. MOVI helps gauge equity market. The Index is calculated taking into account Price to Earnings, Price to Book and Dividend Yield of the Nifty 50 Index.
- B. A low MOVI level indicates that the market valuation appears to be cheap and one may allocate a higher percentage of their investments to Equity as an asset class. A high MOVI level indicates that the market valuation appears to be expensive and that one may reduce their equity allocation.

- C. NSE Indices Ltd. is the calculating agent of NIFTY MOVI. NSE Indices Ltd. shall calculate, compile, maintain and provide NIFTY MOVI values to Motilal Oswal Asset Management Company Ltd. NIFTY MOVI values will be published on the MOAMC website on a daily basis.
- D. Transfer: This transfer is made from the Transferor Scheme to the Transferee Scheme, on the date of allocation based on NIFTY MOVI levels.
- E. Reverse Transfer: This transfer is made from the Transferee Scheme to the Transferor Scheme, when appreciation in the market value of the Transferee Scheme results in a breach of the prescribed allocation level as determined by NIFTY MOVI.
- F. This Plan presently offers two enrolment options:
  - a. One Time Investment
  - b. Systematic Transfer Plan (STP) with a minimum of 6 installments.
- G. Minimum amount under this Plan is as follows:

| Options    | Minimum Amount of Transfer (Rs.)       |
|------------|--|
| One Time   | Rs. 5000/- and in multiples of Re. 1/- |
| Investment | thereafter                             |
|            | Rs. 1000/- and in multiples of Re. 1/- |
| STP        | thereafter                             |

H. The date of allocation will be the 15<sup>th</sup> of every month. In case the date of allocation falls on a Non-Business Day or falls during a book closure period, the immediate following Business Day will be considered as the date of allocation.

**Note:** Under 'One Time Investment' enrolment option, in addition to the 15<sup>th</sup> of every month, allocation will occur on the business day succeeding the date of enrolment into the MOVI Pack Plan.

- I. Under 'STP' enrolment option, if the Unit holder has an existing Systematic Investment Plan (SIP) in the Transferor scheme where the date of SIP falls on a date later than or on 15<sup>th</sup> of every month, then allocation for that amount will occur on 15<sup>th</sup> of the subsequent month.
- J. On the date of allocation, the prescribed percentage of the amount will be transferred in the Transferee Scheme at the closing NAV of the same day i.e. date of allocation.
- K. The AMC will require upto 7 calendar days from the date of submission of valid enrolment forms to register the Investor under this Plan. Therefore, in the intervening period i.e. date of submission of enrolment form and date of registration, if the date of allocation is crossed, then the same will be considered at the next date of allocation.
- L. The amount transferred under this Plan from the Transferor Scheme to Transferee Scheme shall be effective by redeeming units of Transferor Scheme at applicable NAV, (subject to the applicable exit load, if any) and subscribing to the units of the Transferee Scheme at applicable NAV on the date of allocation.

- M. Unit holders can discontinue the Plan at any time by providing a written request which shall be made effective within 7 calendar days of the date of receipt of the said request.
