SCHEME SPECIFIC RISK FACTORS

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:

SBI MAGNUM BALANCED FUND

SBI Magnum Balanced Fund will be investing in equity & equity related instruments as also debt instruments (including securitized debt), Government Securities and money market instruments (such as call money market, term/notice money market, repos, reverse repos and any alternative to the call money market as may be directed by the RBI).

SBI NIFTY INDEX FUND

- A. An investor in an index fund is taking a view on the movement of the stock market in general, and particularly of the stocks that constitute the index. Performance of the Nifty 50 Index will have a direct bearing on the performance of the scheme. The scheme does not seek to protect the value of investment from a fall in the Nifty 50 Index or its constituent stocks. Hence the investor is automatically assuming the risk that if the index falls, his investment is likely to depreciate to that extent. The view taken by the investors on the movements of the stock market and the Nifty is entirely their own and the AMC is not responsible for any loss arising out of the investors' decision to invest or repurchase based on their view of the market.
- B. The portfolio of the fund may underperform to the extent of the impact cost of any transaction by the fund in individual stocks. Other transaction costs and operating costs may also cause the fund to underperform.
- C. Any delay in the receipt of sale proceeds due to the settlement cycles of the stock exchanges, or delay in receipt of dividends from corporates can result in delay in reinvestment of these funds, causing some amount of underperformance. Any delay in receipt of information by the fund manager regarding the change in the composition of the index or corporate actions (dividends, fresh issues of capital, mergers, buyback, etc) related to individual securities in the index may also result in underperformance.
- D. The performance of the scheme may also be impacted by the Tracking Error of the scheme vis-à-vis the Nifty 50 Index. The Tracking Error may arise due to the expenses that the scheme will incur on an ongoing basis, transaction costs involved in buying and selling of index shares, impact cost that may arise due to selling of stocks of the scheme at a loss to meet redemption requirements or on account of holding cash. The Tracking Error that may arise in this scheme is estimated to be in the range of 0.5% to 1.00% on an annualised basis.

SBI MAGNUM EQUITY FUND

SBI Magnum Equity Fund will be investing in primarily in equity & equity related instruments derivatives as also debt instruments (including securitized debt), Government Securities and money market instruments (such as repos, reverse repos and any alternative to the call money market as may be directed by the RBI) and derivative instruments.

SBI MAGNUM MULTIPLIER FUND

RISK CONTROL

Investments in securities carry various risks such as inability to sell securities, trading volumes and settlement periods, interest rate risk, liquidity risk, default risk, reinvestment risk etc. Whilst such risks cannot be eliminated, they may be mitigated by diversification.

In order to mitigate the various risks, the portfolio of the Scheme will be constructed in accordance with the investment restriction specified under the Regulations which would help in mitigating certain risks relating to investments in securities market.

Further, the AMC has necessary framework in place for risk mitigation at an enterprise level. The Risk Management division is an independent division within the organization. Internal limits are defined and judiciously monitored. Risk indicators on various parameters are computed and are monitored on a regular basis. There is a Board level Committee, the Risk Management Committee of the Board, which enables a dedicated focus on risk factors and the relevant risk mitigants. For risk control, the following may be noted:

Liquidity risks: The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. Liquidity Risk can be partly mitigated by diversification, staggering of maturities as well as internal risk controls that lean towards purchase of liquid securities.

Interest Rate Risk: Changes in interest rates affect the prices of bonds. If interest rates rise the prices of bonds fall and vice versa. A well-diversified portfolio may help to mitigate this risk. Additionally, the fund will invest in securities maturing on or before the maturity of the fund. Hence, while the interim NAV will fluctuate in response to changes in interest rates, the final NAV will be more stable. To that extent the interest rate risk will be mitigated at the maturity of the scheme.

Credit Risks: Credit risk shall be mitigated by investing in rated papers of the companies having the sound back ground, strong fundamentals, and quality of management and financial strength of the Company.

Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification. Further, the fund will invest in a basket of debt and money market securities maturing on or before maturity of the fund with a view to hold them till the maturity of the fund. To that extent the Volatility risk will be mitigated in the scheme.

Concentration Risk: The scheme would be investing across PSUs and would endeavour to have an optimum degree of diversification across sectors and market capitalization ranges in order to mitigate Concentration Risk.

Political/Government Policy Risk: Changes in government policy and political decision can change the investment environment. They can create a favorable environment for investment or vice versa.

Please refer to Scheme Information Document for scheme specific risk control measures.

Investment in equities would be done through primary as well as secondary market, private placement / QIP, preferential/firm allotments or any other mode as may be prescribed/ available from time to time.

SBI SMALL & MIDCAP FUND:

The primary investment strategy of the fund is to invest in the stocks of small & midcap companies. A small portion will be invested in large cap stocks and debt & money market securities. Stocks will be selected on the basis of bottom-up & top-down approach.

Basis for selection of approach:

The transition of the economy towards a free market/open economy, which began post the 1991 reforms, has continued largely unabated. This has been despite changing political stewardship and a volatile global macro.

India is poised for a higher economic growth on a sustained basis given the structural factors. There is a large investment universe (over 5000 listed stocks) across various sectors offering ample opportunities for bottom up stock picking.

The changes that we believe offer equity investor's opportunities for active alpha generation are:

- Changes in the pattern of consumption
- Rural consumption
- Consumption of financial services.
- Mechanism of providing government support
- Asset ownership
- Opportunities in outsourcing/exports
- Change in ownership patterns

A high degree of efficiency likely exists in large parts of financial markets, but we believe, it is possible to identify mispriced opportunities due to the market's structural and behavioural tendencies, some of which are elaborated below:

- Time arbitrage
- Special situations
- Research arbitrage.

These opportunities/arbitrages are recognized at each step of our investment process. Identification of market opportunities is an output of our research process. We look at following parameters to identify these opportunities:

❖ Bottom-up

Business Model, Management quality, Valuations and Liquidity are the important ingredients in our bottom up stock picking process.

- Business Model: The competitive edge of the business, its position vis-à-vis competition, impact of geo political issues, impact of policy (Local and Global), the scope of business expansion.
- Management Quality: Management's vision, execution ability, ability to adapt the change, corporate governance and transparency.
- Valuations: Fair value of the company, Return of capital, Growth, Relative value, current premium/discount, expectations.
- Liquidity: We have internal liquidity measures which are considered before we make a buy decision.

❖ Top Down:

Top down views are essentially used to blend our macro understanding and analysis in bottom up stock-picking. Given the nature of economy and regulatory evolution, government policies and regulatory developments can have significant impact on certain sectors.

Some of the domestic variables that are actively tracked to form a top down view:

- Fiscal policy
- Macro indicators and industry data
- Government Policies and regulatory developments
- Monetary conditions and policy

The Top down approach helps us to effectively tilt the portfolio (Defensive, High Beta, Cyclical, etc.)

The combination of the top down and bottom up approach help us identify market opportunities/arbitrage.

SBI BANKING & FINANCIAL SERVICES FUND

The Scheme aims to maximize long-term capital appreciation by investing primarily in equity and equity related securities of companies engaged in Banking and Financial services. The portfolio manager will adopt an active management style to optimize returns. The scheme would invest in Banks as well as Non-banking Financial Services companies, Insurance companies, Rating agencies, Broking companies, Microfinance companies, Housing Finance, Wealth Management, Stock/ commodities exchange etc.

SBI EQUITY SAVINGS FUND

The net assets of the Scheme are invested primarily into equity and equity related instruments including equity derivatives. The Scheme invests rest of the assets into debt and money market instruments for liquidity and regular income. The expected returns from this Scheme can be attributed to the following return drivers:

- Cash and Futures Equity Arbitrage: The scheme endeavors to achieve its primary objective of generating income by exploitation of arbitrage opportunities in equities market.
- Net Long Equity: The Scheme may take limited long only exposures to equity stocks in order to generate market related returns.
- Debt and Money Market Instruments: The Scheme may invest upto 35% of the net assets of the Scheme into debt and money market instruments. This portion of the scheme assets is discretionary to provide liquidity into the scheme, management of derivative margins and accrual of regular income.

8. Amount of transfer: The first Swing STP installment will be processed for the installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, the transfer amount will be derived by the following formula:

Swing STP:

Swing STP is a facility wherein investor can opt to transfer an amount at regular intervals from source scheme of SBI Mutual Fund (SBIMF) to a target scheme of SBIMF including a feature of reverse transfer from target scheme into the source scheme, in order to achieve the targeted market value on each transfer date in the target scheme. This ensures that the market value on each date of the transfer rises by a specified amount at every frequency irrespective of the market price. For example if investor decides that the value of their investment in the target scheme should appreciate by Rs. 1000 per month, then each month investor will invest only to the extent of the shortfall. If appreciation in the target scheme is higher than the target value then this excess value is reverse transferred to the source scheme. Thus the amount to be transferred will be arrived at on the basis of the difference between the target market value and the actual market value of the holdings in the target scheme on the date of transfer.

Terms & conditions of Swing STP are as follows:

1. Source scheme: All open ended schemes (Excluding SBI Magnum Taxgain Scheme and ETF schemes) of SBI Mutual Fund.

Amount of transfer will be calculated by taking into consideration of the target market value (including top-up amount) and actual market value of the investments in the target scheme.
 Amount of transfer: The first Swing STP installment will be processed for the first installment amount specified by the investor at the time of enrollment. From the second Swing STP installment onwards, **the transfer amount will be derived by the following formula:**
In case Top-up amount mentioned as absolute amount:
 Target market value Minus Market Value of the investments through Swing STP in the target scheme/plan/option on the date of transfer.
